---

2 years of experience as a Front End Developer and Computer Science Teacher with over 10 years of experience.

I would like to join a dynamic team and share my passion for technology and design. The combination of both my careers makes me a unique candidate, capable of bringing a fresh approach to work.

Italian and Argentine citizen

Experience

EdTech Referent - Teacher March 2013 - Today
Nuestra Señora del Sagrado Corazón - Buenos Aires, Argentina

I have promoted the adoption of new technologies in education by training teachers on the use of digital tools, significantly increasing their adoption. Additionally, I have introduced virtual activities for events and institutional activities. I have also managed the administration of the Google Workspace package at the institutional level. As a teacher, I have progressively increased the integration of topics such as programming, design, and AI, leading to an improvement in students' computer skills and an increase in the number of young people choosing academic paths related to technology.

Front End Developer October 2021 - June 2023
Corporacion Capsula - Buenos Aires, Argentina (Remote)

I was part of the interdisciplinary team that designed and developed the web interface for a virtual portfolio to conduct operations with cryptocurrencies and currencies, with special attention to security measures.

Used Technologies: JavaScript, Vue.js, Vuetify, Node and APIs such as Google Geolocation. Token management. Postman, Jira, Github.

Web Developer March 2022 - August 2022
Freelance (Part-Time) - Buenos Aires, Argentina

I designed and developed a school website, taking into consideration the needs of the management team, which allowed for increased exposure of the institution and access to school resources by students and their families. Additionally, I developed digital forms that facilitated data processing for the administration department.

Used Technologies: HTML, CSS, JavaScript, Bootstrap.
